Instructions: When you receive a Factory Safety Directive, first see which aircraft it applies to i.e. Factory Safety Directive 001 applied to all 912 & 912S models. Put an "X" in the appropriate space provided.

If it affects your particular aircraft then you must comply with the directive. Upon compliance, in the column to the far right, you would enter C/W (complied with), the date and persons signature performing the work. If you were a 582 owner, you would place an "X" as shown above in the 912 and 912S box and then at the far right you would enter N/A (not applicable), date and sign.

This record must be made a permanent part of your logbook and must remain with the aircraft forever.
